Boland Cellar - RESERVE

Merlot

RANGE INTRODUCTION

Singular expressions of excellence from the same old vineyard blocks are sourced from dedicated grape growers where continuity and quality consistency are of vital importance for Boland's Reserve wines. The utmost attention to detail, both in the vineyards and the cellar, is pursued in producing the best possible quality for the Reserve range.

VINEYARDS

Handpicked grapes are sourced from two prominent Merlot vineyard sites – one is a bush-vine and dryland vineyard near the town of Malmesbury with Oakleaf soils which are rich in clay and shale; and the other between Paarl and Paardeberg, where the soils are deep Red Oakleaf and Duplex. These soils offer good water retention, rich nutrients and enable a deep root system which is ideal for vine health and promoting a balanced wine structure. The vines are mostly north-facing with an average age of 15 years with optimal yields of about 11 tons per hectare, thereby ensuring the vines are in a balanced state.

WINEMAKING

The handpicked grapes are picked at about 24° Balling, followed by destemming and cold-soaking for three days. The fermenting wine underwent pump-overs and after primary fermentation, malolactic fermentation took place in mostly second-filled barrels with a portion in new barrels. This richly structured and concentrated Merlot was further matured in 300-litre French oak barrels for 16 months to gain complexity and flavour. A small portion of 20% of the wine was not matured in wood in order to enhance the final blend with the ripe primary fruit flavours.

TASTING AND FOOD PAIRING

This finely crafted wine expresses concentrated yet ripe Merlot flavours of red cherries, youngberries, plums and red berries. Layers of oak spice and wood shavings are integrated with savoury and tomato notes mingling together with a long and lingering finish. A firmly structured and full-bodied wine which will benefit from careful ageing and will complement grilled sirloin and rump steaks to perfection.

ANALYSIS

Vintage 2018

Alcohol	14.42 %	pH	3.45
Total Acidity	6.1 g/L	Residual Sugar	3.6 g/L
Total Sulphites	103 mg/L
